

qwen3 mediation analysis: primary sample surfaces a safety-family DiD signal (panel c, strict rubric);
see Figure 5 for the disjoint-prompt replication (null) and \$5.3 for the headline interpretation.
Capability families are mechanically null on this analysis (refusal floor at ~0).

(a) Aggregate within-cohort refusal
(observational, confounded by family)

(b) per-family DiD
(broad rubric)

(c) per-family DiD
(strict rubric)
